Hiten Gupta

hitengupta12345@gmail.com | +61 415 765 047 | Adelaide, SA
hitengupta.com | github.com/hiten011 | linkedin.com/in/hitengupta-/

Skills

Languages: C/C++, Java, Python, JavaScript, Embedded C, Bash, MATLAB
Web: React, Vue.js, Express, Flask, HTML/CSS, Tailwind, Bootstrap
Embedded: ESP32, Arduino, FreeRTOS, PlatformIO
Databases & Tools: MySQL, MongoDB, Git

Experience

Junior Software Engineer, Ortomi Dec 2025 - Present
Adelaide, SA

- Developed embedded firmware in **C/C++** for **ESP32**-based robot companions, a consumer product shipped to **66+** countries with **5,000+** units sold
- Optimized data storage logic of ESP32 Non-Volatile Storage (**NVS**), achieving a **66x** read/write speed improvement
- Reduced **LittleFS** overhead by **500ms** by implementing a file caching strategy for frequently accessed files
- Built a QR-code-based diagnostic tool for the team to retrieve and analyze **ESP32** core dump backtraces, reducing firmware debugging turnaround time
- Diagnosed and resolved firmware issues reported by customers

Software Development Intern, James Anthony Consulting June 2025 - Nov 2025
Adelaide, SA

- Delivered features for two client-facing applications (Slow Tours, TestInvest) using **React** and **Express.js**
- Identified and resolved responsive **UI** bugs improving layout consistency across screen sizes

Education

University of Adelaide Adelaide, SA
Bachelor of Computer Science (Advanced) Expected Graduation: Dec, 2026

- **GPA: 6.67/7.0**, 30% Global Citizens Scholarship
- Relevant Coursework: Web & Database Computing, System Programming, Software Engineering, Data Structures & Algorithms, Object-Oriented Programming, Computer System, Mathematics IA & IB

Projects

CatWiz | React, Express, MySQL Dec 2025 - Feb 2026
Website: https://catwiz.aimlclub.org/

- Built a 13-level AI prompt injection challenge for the AIML Club, where players attempt to trick an AI into revealing a hidden password
- Developed the full application using **React frontend, Express API, MySQL database,** and **Google OAuth**
- Deployed on **Render** and ran the event live with **40+** participants

Cinematch | Express.js, MySQL, Vue.js Apr 2025 - Dec 2025
Live Demo: www.youtube.com/watch?v=R5sl3WtY2os **Code**: github.com/hiten011/cinematch

- Built a Tinder-style movie recommendation app that dynamically adapts suggestions based on user swipe interactions
- Designed a custom scoring **algorithm** weighing movie metadata to generate personalized recommendations
- Developed a responsive swipe-based **UI** with smooth animations in **Vue.js**
- Collaborated in a team of **4** using **GitHub** for version control and code reviews

Additional Information

Activities: Volunteer at YouX | Active in AUCPL, LeetCode Contests | AI/ML Club Finance Treasurer & Web Developer
Hobbies: Investing in stock market, Playing Badminton
Certifications: Data Structures & Algorithms in Java – Apna College, CS50: Introduction to Computer Science – Harvard (edX)
